HW/SW Troubleshooting

## PROFILE

I am a 19 year old young IT enthusiast keen to launch my career in Computer Science willing to use the current IT resources that are used in the market. I have created projects in multiple programming languages throughout my degree like Java, C, python, C++ etc. I am also fluent in coding for website development, hosting and multi-platform applications. My aim is to meet work and learn in a multicultural environment. I want to be more creative, productive and be self-confident in what I do.
